## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's request for continuing examination (RCE), amendment and accompanying remarks filed 03/08/05 have been fully considered and entered. Claims 12,20 and 21 have been amended and new claims 24-30 have been added as requested. Applicant's amendments are found sufficient to overcome the prior art rejections set forth in sections 2-5 of the last Office Action. As such, these rejections are hereby withdrawn. Applicant's amendments are found to patentably distinguish the instant claims from the prior art for reasons set forth herein below.

### ***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance: 12-30.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. With specific regard to claim 12, Applicant amended said claim to include the previously allowed subject matter of claims 14 and 21. Specifically the prior art made of record fails to teach or fairly suggest providing an osmotic membrane to provide breathable/impermeable properties to the fabric.

With specific regard to claim 22, the prior art fails to teach or fairly suggest a fabric comprising elastomeric regions/projections on one surface side and wherein the second, opposite side of the fabric is completely free of elastomer. In other words, due to the separation layer provided between elastomeric material and the woven fabric, a fabric having a pattern with

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

elastomeric regions on only one side of the fabric can be obtained. The Examiner refers to figure 5 and page 8, 4-9 of Applicant's specification, which illustrates and discloses elastomeric projection regions on only one side of the fabric while the second side remains elastomeric material free.

With specific regard to claim 23, the prior art fails to teach providing a separation layer interposed between the elastomer layer and the second side of the fabric, wherein the separation layer is adapted to break selectively to allow the elastomer to flow through and form the separate elastomer regions.

With specific regard to claim 30, the prior art fails to teach or fairly suggest a fabric comprising elastomeric regions/projections on both sides thereof.

An updated art search did not produce any substantial art for which to base a rejection and presently there is no motivation to combine references to form an obvious type rejection.
